

Garage connection log

Use what you have. Fill in your own observations. No example measurements are supplied.

Same device, network and activity

Device / intended Wi-Fi network / activity / what a completed task looks like.

Three places to compare

Reference spot / entrance / actual work spot. Sketch or name each place.

First observations

For each place: time / intended network confirmed? / symptom or completed task.

One change and repeated observations

What changed? Repeat the same activity at the same places. Note different conditions.

Next question

Keep / repeat / ask support. Label any separate internet, browser speed or mesh test.

Planning aid, not a network diagnosis. Follow instructions for your exact equipment.
